Introduction

Reliable. Affordable. Built for Growth.

Saskatchewan's growth depends on public-sector organizations working together with purpose, discipline, and a clear focus on results. In 2025–26, Collaboration across Crowns, Treasury Board Crowns, Ministries, and Government Agencies continued to help advance that work. Through shared planning and coordinated action, participating organizations supported cost savings, strengthened reliability, enabled investment, and helped deliver on priorities connected to Saskatchewan's Growth Plan.

The results from this year demonstrate the value of coordinated action:

- **$69.5 million** in cost savings
- **$4.5 billion** in private-sector investment attraction wins across priority sectors
- **8 Strategic Initiative Teams**
- **36 participating entities**

Collaboration helps government make better use of public resources, reduce duplication, and respond to opportunities with greater focus and speed. This work strengthens the relationships and systems needed to support dependable public services and long-term economic growth.

This report highlights the progress made possible through that collective effort. It recognizes the organizations and teams that contributed to this work and shows how Collaboration continues to strengthen Saskatchewan's ability to deliver reliable, affordable, and effective public services while supporting a growing and competitive economy.

Grasslands National Park

Collaborating For Cost Savings

Since its inception in 2013, Collaboration has been a key driver of cost savings. The savings highlighted in this report reflect results achieved through organizations working together across the provincial government and the Crown sector to identify practical, innovative ways to reduce costs and support strong financial management. Cost savings from Collaboration reached approximately $70 million meeting our best-efforts target in 2025–26, bringing total savings to nearly $600 million since reporting began.

2025-26 Collaboration Cost Savings by Initiative and Theme

Initiative or Common Theme	2025-26 Collaboration Cost Savings	
Procurement		
Line Locating	$	17,903,701
Vinyl Surgical Gloves Procurement	$	4,438,538
Joint Infrastructure Installation	$	2,953,815
Other Procurement Cost Savings	$	10,660,357
Total Procurement	$	35,956,411
Operational		
SaskTel/SaskPower Collaboration on Northern Broadband Project	$	16,550,000
Pole Sharing	$	7,915,200
Other Operational Cost Savings	$	9,038,584
Total Operational	$	33,503,784
Total Collaboration Cost Savings	$	69,460,195

$600 MILLION

in cost savings since 2013.

Sample Highlights of Cost-Saving Initiatives

COLLABORATION ON NORTHERN BROADBAND PROJECT – $16,550,000

SaskTel, SaskPower, and Ministry of Highways partnered to use existing transport infrastructure to expand fibre connectivity in northern communities, reducing costs and improving delivery efficiency.

SHARING SPACE ON POWER POLES – $7,915,200

By using space on SaskPower poles, SaskTel can deliver fibre services more cost-effectively than through underground installation or construction of separate poles.

HEALTHCARE PROCUREMENT – $4,728,715

3sHealth led joint procurement of medical supplies, generating shared savings for the Saskatchewan Health Authority, All Nations Healing Hospital, St. Paul's Hospital, Cooperative Health Centre, and Athabasca Health.

CO-LOCATION FOR ADVANCED METERING INFRASTRUCTURE METER READING PROGRAM – $1,504,337

SaskPower installs equipment on SaskTel towers across the province to support its meter reading program, avoiding the cost of building separate infrastructure.

ORACLE LICENSING PROCUREMENT – $1,003,164

SaskEnergy, SaskWater, and Saskatchewan Crop Insurance Corporation leveraged an existing Ministry of SaskBuilds and Procurement contract for Oracle licensing, achieving savings compared to procuring licences independently.

THE SASKATOON SOUTH-EAST WATER SUPPLY (SSEWS) WATER MODEL – $640,000

The Water Security Agency developed a water model for the Saskatoon South-East Water Supply system to assess full system capacity, including SaskWater canals and WSA reservoirs. Providing SaskWater with access to this model avoided the need for a separate study and delivered cost avoidance savings.

BUILDING OPERATIONS ENERGY CHALLENGE – $466,000

Led by SaskBuilds and Procurement, 82 buildings participated in an energy challenge to reduce electricity and natural gas use between the 2023 and 2024 calendar years. Resulting operational improvements contributed to utility bill savings realized in 2025.

NATURAL GAS OPTIMIZATION – $459,679

SaskEnergy and SaskPower collaborate to optimize the utilization of their natural gas transportation and storage contracts when capacity is not fully utilized.

Collaborating to Advance Strategic Priorities

The Strategic Initiative Teams provide a structured way for Crowns, Treasury Board Crowns, Ministries, and Government Agencies to work together on priority areas aligned with Saskatchewan's Growth Plan. These teams focus on solving shared challenges that no single organization can address alone – improving coordination, reducing duplication, and accelerating delivery. By bringing the right partners to the table early, these initiatives help translate provincial priorities into actions that strengthen reliability, support affordability, and continue to enable sustainable growth across the province.

Team Highlights:

1. Investment Attraction Working Group

The Investment Attraction Working Group (IAWG) supports the Saskatchewan Growth Plan goal of achieving $16 billion in private capital investment annually by 2030. In 2025–26, Government of Saskatchewan investment attraction efforts contributed to 30 private sector investment decisions with a combined value of $4.5 billion. Private capital investment totaled $13.6 billion in 2025 and is forecast to reach $13.7 billion in 2026.

The IAWG continues to hold coordinated project meetings with all impacted Crowns and Ministries, providing a single point of access for proponents to advance projects and mitigate risk. This concierge approach across government reduces red tape and creates clearer pathways by addressing barriers to economic development.

Sample highlights:

The Bell Canada Data Centre project will be one of the largest capital investments in the province's history. IAWG members worked together to help Bell identify the optimal site and address questions at each stage of its decision process, leading to a final investment decision in March 2026.

The IAWG also continued to actively support mining projects in northern Saskatchewan (including NexGen, Denison, Orano – Midwest, Uranium Energy Corp, StrongPine, SSR, and Paladin). Denison Mines and NexGen Energy received Canadian Nuclear Safety Commission approval to construct uranium mines in February and March 2026, respectively. SaskPower and SaskTel met monthly to identify northern mining customers requiring fibre-optic and power connections. Both teams also work to identify new projects and collaborate earlier in design and construction, helping streamline timelines and reduce potential costs. Supporting these projects will continue to require coordinated efforts across ministries, agencies, and Crowns to efficiently meet project needs.

2. Regional Infrastructure

The Regional Infrastructure Team has advanced development of a province-wide, GIS-based infrastructure mapping tool to strengthen Saskatchewan's competitiveness for industrial and large-scale investment. The tool integrates data from Ministries, Crowns, and Agencies to provide a consolidated view of infrastructure and service availability, including utilities and other critical assets. This shared platform allows participating organizations to work from a common understanding and respond more efficiently to investment inquiries.

A key achievement over the past year has been the level of internal data sharing and collaboration enabled by this initiative. Saskatchewan is well positioned relative to other jurisdictions, many of which do not have comparable cross-organizational visibility of their infrastructure. The tool supports real-time industry inquiries through the Ministry of Trade and Export Development, improving the timeliness and coordination of government responses to proponents.

The application is currently being tested and refined, with ongoing work focused on usability, governance, and future enhancements such as capacity visibility. As adoption expands, the tool is expected to become a core enabler of site readiness, infrastructure planning, and investment

attraction. The Regional Infrastructure Team directly supports collaboration objectives and the Growth Plan by aligning partners, reducing duplication, and strengthening Saskatchewan's ability to attract and deliver major projects.

3. Shared Utility Corridors

The Shared Utility Corridors Team works proactively to identify and coordinate opportunities for shared corridors across Saskatchewan. This approach reduces future infrastructure costs, shortens development timelines, and improves coordination among Crowns, ministries, municipalities, and landowners. It also supports investment attraction by enabling earlier alignment on infrastructure needs and reducing risk for private-sector proponents.

Over the past year, the team strengthened its foundation by updating its governance framework and completing detailed planning for a Regina-area pilot corridor. The pilot generated significant value through reusable corridor designs, environmental and routing insights, and practical lessons that support a more consistent approach for future projects.

SGI, SaskPower, and the Ministry of Highways worked together to create a high-clearance corridor to Denare Beach to support community reconstruction. The project involved working with Ready-To-Move builders and transporters to identify infrastructure modifications needed to enable safer, more efficient transport of buildings to site.

Current work focuses on engagement with rural municipalities around Regina and Saskatoon, alignment with Ministry of Highways planning, and a shift toward execution-focused coordination where opportunities are most likely to advance. This approach shifts the emphasis from long-term conceptual planning to readiness and responsiveness.

The initiative has advanced Crown and Ministry collaboration and early-stage coordination between utilities. It supports collaboration objectives and the Growth Plan by lowering infrastructure risk, strengthening planning discipline, and enabling faster, more coordinated delivery of major investments.

4. Information Technology / Chief Information Officer Working Group

The IT / CIO Working Group brings together technology leaders to strengthen coordination, alignment, and shared outcomes in digital initiatives. Its primary purpose is to enable a whole-of-government approach to IT that supports service delivery, manages risk, and maximizes value from shared investments. The working group has four sub-committees focused on cyber security, higher education, artificial intelligence, and IT procurement.

Over the past year, these working groups have improved alignment on priorities, strengthened connections with procurement partners, and increased visibility into shared challenges and opportunities. A key achievement has been the federation of Microsoft Copilot across government, Crowns, and agencies, creating a consistent forum for collaboration and problem-solving. This spirit of collaboration was also reflected in a successful SaskHack Saskatchewan Crown Sector Hackathon hosted in Regina, which brought together undergraduate post-secondary students from across Saskatchewan to solve real-world challenges aligned with the Crown sector.

The team also advanced work on responsible innovation, including coordination on artificial intelligence and development of a cross-government AI policy to support consistent, risk-aware adoption. Engagement on software and vendor management has strengthened collective understanding and positioned organizations for a more coordinated, long-term approach to major technology agreements.

Looking ahead, priorities include strengthening integration with procurement and ensuring appropriate resourcing to sustain progress. The IT / CIO Working Group continues to support Collaboration objectives and the Growth Plan by reducing silos, enabling coordinated digital leadership, coordinating IT procurement and cyber efforts, and building a more connected government technology environment.

5. Property Management

The Property Management Working Group brings together organizations to improve coordination and strategic oversight of public sector land and building assets. The Property Management team is advancing a GIS-based inventory of public sector land and buildings to improve visibility, coordination, and data-informed decision-making. Over the past year, the team strengthened cross-agency collaboration with the Saskatchewan Public Safety Agency to support critical operations, including 911 services.

Cross-agency leasing and co-location initiatives, including those involving SaskTel, SaskPower, and SaskEnergy, are demonstrating opportunities to optimize space, reduce duplication, and improve asset use. Participation now includes the Saskatchewan Water Security Agency, the Ministry of Parks, Culture and Sport, and the Saskatchewan Health Authority. Work continues to strengthen the platform and support a more integrated, cost-effective, and strategic approach to managing public sector properties.

6. Mental Health

The Mental Health Strategic Initiative Team is a community of practice for Human Resource professionals that provide mental health programs, services, and training to the public sector. Over the past year, the team focused on raising awareness of mental health services available to public services. The Mental Health Strategic Initiative Team advances Collaboration by breaking down silos and fostering coordinated action. Its work supports the Growth Plan by contributing to a healthier public service.

7. Strengthening Saskatchewan's Supply Chain

The Strengthening Saskatchewan Supply Chain Team, a coalition of supply chain leaders from major purchasing organizations across the Government of Saskatchewan, is advancing the province's growth mandate by creating opportunities for Saskatchewan's highly capable and diverse supplier community. This team understands that maintaining reliable and affordable public utilities and programs is benefited by a resilient and local supply chain. Through focused supplier engagement and development, the team is helping unlock Saskatchewan ingenuity and expand the capacity of the province's procurement and contractor ecosystem.

In 2025–26, the team identified underserved areas across our shared supply chains and targeted local contractor capacity growth to close critical gaps. Local suppliers and trusted supplier advocacy organizations played a central role in shaping priorities by bringing forward on-the-ground insight, highlighting emerging opportunities, and helping ensure strategies translate into real, measurable outcomes for Saskatchewan businesses and workers.

These efforts contributed to a significant increase in local procurement and supported the expansion of jobs and capabilities within Saskatchewan's supplier and labour community. Over the past fiscal year, more than $2.8 billion in procurement opportunities was committed to Saskatchewan-based businesses by Saskatchewan Government purchasers. This number reflects a $700 million increase from last year in local contractual commitments across the Government of Saskatchewan. This annual result represents that 71 per cent of total Crown procurement commitments and approximately 94 per cent of procurement commitments across Government of Saskatchewan ministries and executive branches were made to Saskatchewan-based companies.

The team also played a vital role in informing the government's actions and responses to the constrained global trade market. As an example, when international tariffs were levied against Canadian suppliers, this team worked quickly to collaborate across organizations and enable timely, strategic action to prioritize local and domestic sourcing options. This effort protects local jobs and reinforces Saskatchewan's commitment to a strong, resilient and local supply chain.

8. Shared Strategic Procurement

The Shared Strategic Procurement Committee identifies and advances collaborative procurement opportunities to generate cost savings and improve efficiency across government and Crowns. Over the past year, the committee expanded the use of contract piggybacking, particularly in information technology, reducing duplication, accelerating procurement timelines, and enhancing value for taxpayers. These efforts have strengthened coordination and improved use of existing procurement tools.

Looking ahead, the committee will continue to expand IT-related opportunities while pursuing savings in other procurement areas. Supporting the participation and growth of Saskatchewan-based companies remains a priority, ensuring alignment with broader economic development goals.

The committee contributes to the Growth Plan by delivering measurable savings, improving value-for-money outcomes, and serving as a centre of expertise and best practice in public sector procurement. Through collaboration and shared learning, it continues to strengthen procurement capability across the public sector.

Collaboration Participants

Collaboration has been made possible through the vision and leadership of Premier Scott Moe, Collaboration Co-Chairs the Honourable Jeremy Harrison, Minister of Crown Investments Corporation and Grant J. Kook, and executive leaders who have championed this initiative across the public sector. Their commitment to partnership and progress has laid a strong foundation for success working as one-team across government.

The following individuals have played an important role in advancing Collaboration this year, contributing their expertise and time to support meaningful outcomes for the people of Saskatchewan.

(As of March 31, 2026)

Collaboration Co-chairs

Honorable Jeremy Harrison
Minister of Crown Investments Corporation

Grant J. Kook
Board Chair, SaskTel

Collaboration Leadership Committee

Tim Highmoor, Crown Investments Corporation (Chair)

Amy Standish, Ministry of Agriculture

Andrew Voroney, Saskatchewan Government Insurance

Bonnie Chambers, Ministry of Government Relations

Brent Sukenik, Innovation Saskatchewan

Cam Swan, Ministry of SaskBuilds and Procurement

Cammy Colpitts, Lotteries and Gaming Saskatchewan

Carla Male, Saskatchewan Health Authority

Cory Frei, SaskEnergy

Cory Hughes, Ministry of Energy and Resources

Cullen Stewart, Ministry of Finance

Daniel Hersche, Global Transportation Hub

Darcy Smycniuk, Ministry of Immigration and Career Training

David Boehm, Ministry of SaskBuilds and Procurement

Derek Leach, SaskWater

Elissa Aitken, Ministry of Labour Relations and Workplace Safety

Greg Hutchings, Saskatchewan Liquor and Gaming Authority

James Turner, Ministry of Health

Karen Cossitt, Ministry of SaskBuilds and Procurement

Kevin Murphy, Ministry of Environment

Rhea Brown, SaskPower

Shara McCormick, SaskTel

Terri Kentel-Weinheimer, Saskatchewan Crop Insurance Corporation and Water Security Agency

Thon Phommavong, Water Security Agency

Tom Lees, Ministry of Highways

Trent Blezy, Executive Council and Office of the Premier

Tyler Lynch, Ministry of Trade and Export Development

Collaboration Working Group

Amy Standish, Ministry of Agriculture

Amanda Plummer, Ministry of SaskBuilds and Procurement

Cammy Colpitts, Lotteries and Gaming Saskatchewan

Christine Harrop, Innovation Saskatchewan

Curtis Olyowsky, Ministry of Finance

Debbie Johnson, SaskTel

Ian Goeres, Ministry of Government Relations

Jill Clark, Crown Investments Corporation

Joel Gritzfeld, SaskWater

John Britton, 3sHealth

Karah Mayes, Public Service Commission

Kevin Blelloch, SaskEnergy

Kim Hambleton, SGI

Kirk Brecht, Ministry of Energy and Resources

Lindell Veitch, Ministry of Advanced Education

Penny McCall, Ministry of Agriculture

Shannon Gunderson, SaskTel

Stephanie Walton, Ministry of Highways

Investment Attraction Working Group

Tim Highmoor, Crown Investments Corporation (Co-Lead)

Tyler Lynch, Ministry of Trade and Export Development (Co-Lead)

Amy Standish, Ministry of Agriculture

Bryan Dilling, Ministry of Trade and Export Development

Cory Hughes, Ministry of Energy and Resources

Cullen Stewart, Ministry of Finance

Darcy Smycniuk, Ministry of Immigration and Career Training

David Boehm, Ministry of SaskBuilds and Procurement

David Cooper, Water Security Agency

Daniel Hersche, Global Transportation Hub

Doris Morrow, Ministry of Trade and Export Development

Greg Meister, SaskTel

Julie Leggott, Crown Investments Corporation

Kevin Murphy, Ministry of Environment

Leanne Persicke, Crown Investments Corporation

Nadiya Mason, Crown Investments Corporation

Nikhil Karanwal, SaskEnergy

Pat Parenteau, Ministry of Labour Relations and Workplace Safety

Randy Avery, SaskWater

Rhea Brown, SaskPower

Robin Speer, Ministry of Trade and Export Development

Shirley Xie, Crown Investments Corporation

Thon Phommavong, Water Security Agency

Tina Ekert, SaskPower

Tom Lees, Ministry of Highways

Wes Kotyk, Ministry of Environment

Regional Infrastructure

Randy Avery, SaskWater (Co-Lead)

Doris Morrow, Ministry of Trade and Export Development (Co-Lead)

Courtney Balkwill, SaskPower

Dan Way, Ministry of Energy and Resources

Darlene Guy, SaskWater

Doug Daniels, Ministry of SaskBuilds and Procurement

Jeff Paterson, Water Security Agency

Jonathan Kotylak, Ministry of Highways

Kyle Ulmer, Ministry of Agriculture

Leah Clark, Water Security Agency

Liam Turnley-Johnston, Crown Investments Corporation

Michael McMurray, SaskEnergy

Phil Pearson, Ministry of Parks, Culture and Sport
